I am a Computer Science and Engineering graduate with practical qualities. A confident and organized team member with excellent communication skills. I have developed excellent time management and organization skills during my study and work period due to close knit course works and deadlines. I am adaptable and able to work well under pressure. I am looking for an opportunity within an innovative and friendly workspace where I can utilize my soft skills and learn indepth knowledge of new technologies.

Key Skills

Problem Solving Skills: I started enjoying problem solving since I was learning to write C programming. I have participated in different programming languages contest and solved good number of problems.

Programming Languages: Good knowledge on different programming languages including C, C++, JavaScript, React Js, Laravel, jQuery, AJAX, API, CSS. I have done couple of projects in my term time and workplace. I am passionate about programming.

Accuracy and Time Management Skills: I have a good accuracy and time management skills. I have developed these during my study period by submitting my tasks and preparing myself within timeline.
